YACHT DESIGN

Halibut 42 Motorsailers

My 42' **Halibut Motorsailer** designs are modeled on the heavy displacement commercial fishing "schooners" that have chased halibut in the North Pacific for the last 100 years or so. The **Halibut Schooner 42** has a low rig and bowsprit; **Halibut Ketch 42** is ketch-rigged with a flying bridge. The hulls are multi-chine full keel with a round stern. Steel or wood construction.

I offer a wide range of yacht design and naval architecture services from new design of power, sail, and small boats to oversight of refits and restoration, to consulting on Transport Canada and ISO regulations and standards for commercial vessels. **For more information, contact :**
