

### Memory 38' SPECIFICATIONS\*

Designer: Tad Roberts, N.A.

LOA	38'2"
LWL	37'11"
BEAM	10'1"
DRAFT	2'8"
DSPL	15,000 lbs.
CONSTRUCTION	Fiberglass with Vinylster Resin & Foam Coring
POWER	51 HP Yanmar
TOP SPEED	8 Knots
FUEL	100 Gallons
WATER	100 Gallons

**Built by Memory Yachts**

*\*subject to change*

## A YEARNING FOR THE TRADITIONAL...

The Memory Yachts partnership of Daniel Morris and Mike McConville was forged to develop a line of traditionally styled diesel cruisers. Their goal is to build boats which appeal to lifelong sailors ready to furl their jibs and move into a climate-controlled wheelhouse, and to power boaters whose needs were not met by other sectors of the industry.

The Memory Yachts 38 was based on the "Yellow Cedar" design by Tad Roberts, NA— proof that elegance, economy, practicality and simplicity never go out of style. A coastwise cruiser, the Memory Yachts 38 is a comfortable platform for exploring waterways, rivers and bays.

True to its name, Memory Yachts blend the strength, reliability and convenience of modern construction with timeless tradition and elegance.

*"Such [classic] yachts in their day were considered the ultimate and those that are still held in loving hands are appreciated by all who see them. The car industry with its retro designs has looked to the past for inspiration in the future. Could we in the marine industry be so wise?"*

—Jay Coyle, YACHTING, July 1999.
